Comment. During the reported period, a total of 393 carloads of gasoline were dispatched and 461 carloads of gasoline were received at Aken fuel depot. As compared with the last reported period, these figures indicate a decrease of incoming shipments and an increase of outgoing shipments. Outgoing shipments particularly increased in July due to intensified air activity. The fuel depot in Aken belongs to the Southern Fighter Corps of the Twenty-Fourth Air Army. The regiments of the corps also receive minor quantities of fuel from the central fuel depot of the Twenty-Fourth Air Army in Witten. In late July, Aken fuel depot served two fighter regiments each at Grossenhain, Zerbst and Koethen and one regiment each at Merseburg, Altenburg, Alt Loennwitz, and Justerbog. The regiment stationed at the latter post moved there from Brandenburg in late May, a movement which can also be inferred from the present report. An alert flight of MiG-15s is stationed at Erfurt-Bindersleben airfield and is served by the ground personnel of the fighter regiment at Altenburg. Except for increased fuel deliveries in July to the regiments in Grossenhain and Alt Loennwitz which belong to the fighter division in Grossenhain, fuel was dispatched at an equal rate to the regiments during the reported period. It is believed that some of the shipments on 25 July were dispatched to the two fighter regiments in Zerbst.
